Polycom® VoiceStation® 500

Crystal-clear conferencing for smaller rooms and desktops

Benefits

Bluetooth connectivity – High-quality hands-free calling through your mobile phone or the Internet

2.5mm applications port – Plug into a wired connection for mobile phone and Internet calling when Bluetooth is not available

More productive calls – Polycom's patented Acoustic Clarity Technology allows simultaneous, natural, free-flowing conversation

360-degree room coverage – A powerful, digitally-tuned custom speaker and three sensitive microphones provide uniform coverage from up to 7 feet away

Hands-free calls – A great hands-free conferencing solution for home offices and small businesses

Easy to use and install – Connects into any analog phone jack

Secondary phone options – Plug in a fax machine or computer modem, or plug in a handset for private calls

Bluetooth®-enabled voice conferencing designed for offices and small meeting spaces

The Polycom VoiceStation 500 is a small Bluetooth-enabled conference phone ideally suited for desktops, offices, and other small rooms. With a microphone range of up to seven feet, the VoiceStation 500 is perfect for small conferences with three to four participants. Plus its compact industrial design fits well on a desk or small table, making it a great solution for offices. With the VoiceStation 500, you can enjoy Polycom's legendary voice quality at an affordable price.

Use your Bluetooth-enabled mobile phone to connect wirelessly to the VoiceStation 500 for hands-free voice conferencing. It can also connect to a Bluetooth-enabled computer for high-quality hands-free conferencing over Internet calling services such as Skype. If your mobile phone or computer is not Bluetooth-enabled, simply use the integrated 2.5mm applications port for wired connections.

Featuring Polycom's award-winning Acoustic Clarity Technology, the VoiceStation 500 delivers significantly improved voice quality over the previous-generation VoiceStation 100. The VoiceStation 500 features three sensitive microphones that offer 360-degree room coverage. Smart technology, such as Dynamic Noise Reduction (DNR), provides maximum microphone sensitivity, while reducing distracting room and background noise. Plus, Polycom's legendary full-duplex technology ensures that everyone on the call can be heard.

Convenient controls for Bluetooth, volume adjustment, mute, redial, flash and hold are located on an intuitive, easy-to-use keypad. When dialing over regular phone lines, a handset phone can be plugged in for private calls, or simply switch back to the VoiceStation 500 for hands-free conversations.

Make Great Things Happen with VoiceStation 500

In today's Internet driven world, the ability to conduct real time communication and collaboration has become critical to an organization's survival. As the market leader in voice, video, data and Web solutions, our award-winning conference technology makes it easy for people to interact and maximize productivity — over any network, in just about any environment, anywhere around the globe. That's why more organizations worldwide use and prefer Polycom conferencing solutions. Because when people work together, great things happen. See how you, too, can achieve great things with Polycom VoiceStation 500.
